

## INTERVIEW WITH THE NUCLEAR PHYSICIST AND UFOLOGIST STANTON.T.FRIEDMAN

-----

*Stanton Terry Friedman (born July 29, 1934) is a professional Ufologist. He studied physics at the University of Chicago and worked as a nuclear physicist on research and development projects for several large companies. He is a dual citizen of the U.S. and Canada. Friedman was employed for 14 years as a nuclear physicist for such companies as General Electric, Aerojet General Nucleonics, and McDonnell Douglas... where he worked on advanced, classified programs on nuclear aircraft, fission and fusion rockets, and compact nuclear power plants for space applications.*

*Since the 1980s, he has done related consultant work in the radon-detection industry. Stanton Friedman's professional affiliations have included the American Nuclear Society, the American Physical Society, the American Institute of Aeronautics and Astronautics. In 1970 he left full-time employment as a physicist to pursue the scientific investigation of UFOs. Since then, he has given lectures at more than 600 colleges and to more than 100 professional groups in 50 states, nine provinces, and 18 foreign countries. Additionally, he has worked as a consultant on the topic. He has published more than 80 UFO-related papers and has appeared on many radio and television programs. He has also provided written testimony to Congressional hearings and appeared twice at the United Nations. \**

**U.I.S : Is there a particular reason why you are interested in ufo's (personal observations, for example, or other reasons)?**

**S.T.F :** Scientific curiosity, very excited about space, worked on far out technology.. nuclear aircraft, fission and fusion propulsion systems...Being a nuclear physicist leads to much curiosity.

No personal experiences.

**U.I.S : how long have you been interested in this phenomenon?**

**S.T.F :** I read my first book, Edward Ruppelt's "Report on UFOs", back in 1958 when 24 and a young nuclear physicist working on nuclear airplanes. I then read about 15 more books and found "Project Blue Book Special Report No. 14 which had loads of data. and proof the US government was lying. I have since been to 20 archives, have lectured in all 50 US States, all 10 Canadian provinces, and 18 other countries, provided testimony twice at the UN and to congressional hearings, besides writing or co writing 5 books.

**U.I.S : Do you think that one or more extraterrestrial civilizations is a reality in our universe?**

**S.T.F :** There is overwhelming evidence that there have been many ET visitors to Earth. Whether they are independent of each other or are all connected ,I have no idea. I think based on Kepler's findings that there are civilizations throughout the galaxy. Most much more advanced than are we.

**U.I.S : Why are you convinced that some of the observations are crafts of extraterrestrial origin?**

**S.T.F :** There are reports from all over the planet of objects which have clearly been manufactured (Not just lights in the skies), whose behavior as observed visually from the ground and air and by radar, clearly cannot be duplicated by craft we can manufacture or we would have used them in the many wars there have been. If not made here, they were made somewhere else. There are thousands of physical trace cases from more than 70 countries. One out of 6 involve reports of beings. There have been a number of solid abductions. In my lectures I typically cover 5 large scale scientific studies that fewer than 2% of my lecture attendees have read. I discuss these in the first chapter of "Flying Saucers and Science"

**U.I.S : What would you say is the most important case in the history of ufology? Can you explain why you consider this event so important?**

**S.T.F :** I don't know of easy ways to cross compare. I like Roswell, and the Betty and Barney Hill case, and the RB-47 case, and Delphos, Kansas, and the Iranian jet cases.

**U.I.S : We have already mentioned the MAD propulsion systems in our website. Do you think this technology is the most appropriate to explain the performance of extraterrestrial flying objects?**

**S.T.F :** I think there are two different systems.. one for interstellar travel... likely nuclear fusion, and one for in the atmosphere. I think MAD would be suitable for the latter. In both cases there may well be very advanced technologies about which we know nothing. We are a primitive society with some fancy technology for less than 200 years.The planet is over 4 Billion years old. Zeta 1 and Zeta 2 Reticuli (see the discussion in "Captured! The Betty and Barney Hill UFO Experience " by myself and Kathleen Marden, Betty's niece,) are only 39.3 Light years from here, and only an eighth of a light year apart from each other but a billion years older than the sun. Technological progress comes from doing things differently in an unpredictable way.

**U.I.S : Do you have a theory about technology to move into space at nearly the speed of light, a theory that would respect the laws of Albert Einstein? Do you think it will be possible one day to ignore those laws ?**

**S.T.F :** Accelerate at one g for a year and one gets very close to the speed of light.. taking advantage of as much free energy (cosmic Freeloading) as possible. We use gravitational assist for all our deep space trips. At 99.99% of the speed of light one can go 37 light years in 6 Months pilot time. I think we will work with those laws... Einstein has only replaced Newton in some situations. But I am not a psychic

**U.I.S : Would you have a message for the readers of UFO INVESTIGATION AND SCIENCE ?**

**S.T.F :** Yes. It is clear as noted in my book "Flying Saucers and Science" that there is overwhelming evidence that we are not alone, that many governments have withheld some of the best data, that there are no good arguments against these conclusions and that we need to start thinking of ourselves as Earthlings rather than as Frenchmen, Canadians, American etc.

There are a number of articles at my website [www.stantonfriedman.com](http://www.stantonfriedman.com)

---

Thank you Mr Friedman for giving this exclusive interview with **Investigation UFO et Science.**
